Unit. $AB := 1$ $N_u := 3$

Given. $N_1 := 3.30303$ $N_2 := 1.40404$

$A := \frac{N_u}{N_1}$ $B := \frac{N_u}{N_2}$

Descriptions.

$\frac{N_u}{B - A} = 2.442133$

For 2 variables there are 4 subsets.

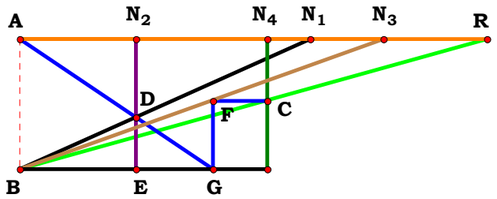
0, 0: 0

1, 0: $\frac{N_u}{N_u - A}$

0, 2: $\frac{N_u}{B - N_u}$

1, 2: $\frac{N_u}{B - A}$

1CST1R1



$N_1 = 2.22514$
$N_2 = 0.88850$
$N_3 = 2.79164$
$N_4 = 1.89818$
$R = 3.58260$

Unit. $AB := 1$ Given. $N_1 := 2.22514$ $N_2 := .88850$ $N_3 := 2.79164$ $N_4 := 1.89818$

$N_u := 3$ $A := \frac{N_u}{N_1}$ $B := \frac{N_u}{N_2}$ $C := \frac{N_u}{N_3}$ $D := \frac{N_u}{N_4}$

Descriptions.

$$\frac{N_u \cdot (B - A)}{C \cdot D} = 3.582585$$

For 4 variables there are 16 subsets.

0, 0, 0, 0:	0	0, 0, 0, 4:	0

Definitions.

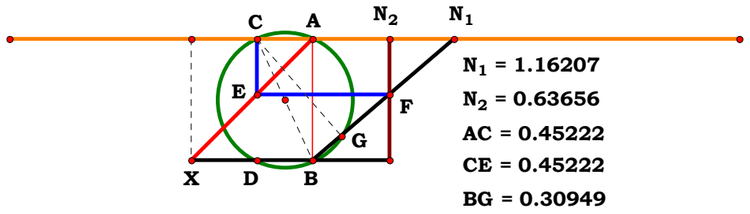
$$CE - \frac{N_1 - N_2}{N_1} = 0 \qquad CE = 0.452219$$

$$AC - \frac{N_1 - N_2}{N_1} = 0 \qquad AC = 0.452219$$

$$BG - \frac{N_2 - N_1 + 1}{\sqrt{N_1^2 + 1}} = 0 \qquad BG = 0.309496$$

Introduction to Roll Away the Stone.

Using a six sample set.



Motions in Roll Away the Stone.

The motion of the circle, or stone, in Roll Away the Stone can be accomplished by any number of structures, I just use a simple sample set in this work.

One of the greatest errors by so called mathematicians is when they ask, how does one compute, or manipulate the indexing system of mathematics to account for such things as time, space, motion, which, in of themselves are not things. Each and every one are just some material difference. One cannot predicate of a predicate no matter what predicate it is. One can no more claim that time slows down, space bends, or motion moves than any other element of a thing. Indexing systems work with any difference using any boundaries and the indexing system is not modified or manipulated any differently for any particular one of them. The indexing system is universal or capable of complete induction, a concept which seems to be on the lips of mathematicians but often lacking in their mind. A mathematician cannot help but to produce fantasy or gibberish and teach that gibberish or fantasy no more than a religious fanatic when basic concepts are not resident in the mind, I do not care if you call them Newton or Einstein or that one preaches that gibberish in the most prestigious colleges and universities.

Branch Two.

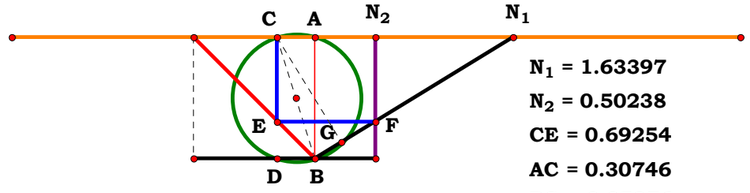
Unit.

$AB := 1$

Given.

$N_1 := 1.63397$

$N_2 := .50238$



$N_1 = 1.63397$

$N_2 = 0.50238$
